Aviation Refueling Nozzle – approximately 10 inches in length by 4 inches max diameter

**Historical Photo and Information**

This object was a nozzle as part of a Probe and Drogue aerial refueling system made by the Parker Aircraft Co. It was used from the 1950's through the 1970's on U.S. military aircraft including the F4 Phantom II, F-105 Thunderchief, Eurofighter Typhoon, and the A-7 Corsair.
